Proven Genetics with a History of Excellent Performance

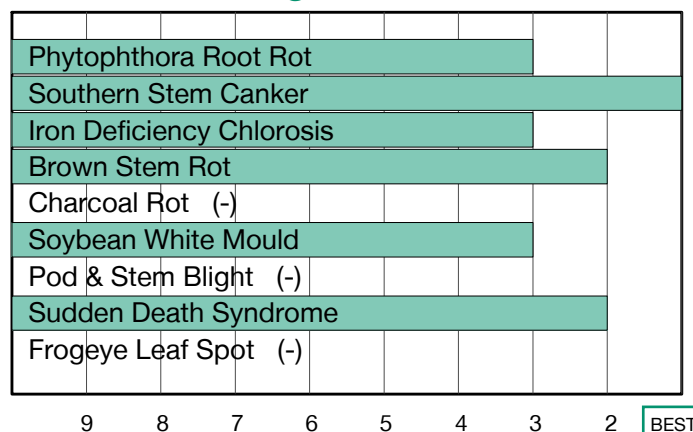

- Medium-tall plant type with very good standability and tolerance to White Mould
- Rps3a with dependable field tolerance to Phytophthora Root Rot
- Outstanding SDS tolerance

Plant Characteristics

Plant Height	Medium-Tall
Canopy Index	5.61
Branching	Moderate
Growth Habit	Indeterminate
Flower Colour	Purple
Pubescence Colour	Light Tawny
Pod Colour	Tan
Hilum Colour	Black
Chloride Sensitivity	Excluder

Disease Ratings

Agronomic Traits

Emergence	2
Standability	3
Shatter Tolerance	2
Green Stem	3
Estimated Seed Size	Large
Protein	High
Oil	High
Narrow Rows	1
Wide Rows	2
Metribuzin Response	Good
Sulfentrazone Response	-

Diseases and Pests

Phytophthora Root Rot (PRR) Source	Rps3a
Soybean Cyst Nematode (SCN) Races	MR3
(SCN) Source	PI88788
Root Knot Nematode (RKN) Incognita	-

Adaptation to Soil Types

Drought Prone	Best
High pH*	Good
Highly Productive	Best
Moderate/Variable Environments	Best
Poorly Drained	Best

For more information: Visit syngenta.ca, contact our Customer Interaction Centre at 1-87-SYNGENTA, or follow @NKSeedsCanada on X.

1-9 Scale: 1 = Best, 9 = Worst, (-) = Not Available.

Adaptation and Responses: Best > Good > Fair > Poor.

Protein and Oil: Ultra High > Very High > High > Average > Low.

Canopy Index: Reflects plant height, width and branching. 1 = Smallest, 9 = Largest.

* Represents an assessment of stand establishment, chlorosis severity and yield performance

Performance evaluations are based on field observations and public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions. IMPORTANT: ALWAYS READ AND FOLLOW SEED BAG/TAG

DIRECTIONS: Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

BASF, LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF Group. Only seed labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides. It is a violation of federal law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED AND APPROVED FOR SUCH USES. Contact the Pest Management Regulatory Agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology. Products with XtendFlex® Technology contain genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. XtendFlex® is a registered trademark of the Bayer Group. Used under license. Bayer CropScience Inc. is a member of CropLife Canada. Trademarks and service marks are the property of their respective owners. © 2024 Syngenta.

Published 18 April 2024. For use until 30 April 2025.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
