# SOYBEANS

# S14-C7XFBRAND

#### **Consistent Yield with Complete Defensive Package**

- Proven genetics that are broadly adapted across soil types
- Excellent standability with strong tolerance to Soybean White Mould
- Strong performance South of zone while holding plant height

### **Plant Characteristics**

Plant Height	Medium-Tall
Canopy Index	5.61
Branching	Moderate
Growth Habit	Indeterminate
Flower Colour	Purple
Pubescence Colour	Light Tawny
Pod Colour	Brown
Hilum Colour	Brown
Chloride Sensitivity	Includer

## **Agronomic Traits**

Emergence	3
Standability	3
Shatter Tolerance	2
Green Stem	2
Estimated Seed Size	Small
Protein	High
Oil	High
Narrow Rows	1
Wide Rows	1
Metribuzin Response	Best
Sulfentrazone Response	Good

# **Disease Ratings**

#### **Diseases and Pests**

Phytophthora Root Rot (PRR) Source	Rps1c
Soybean Cyst Nematode (SCN) Races	MR3
(SCN) Source	PI88788
Root Knot Nematode (RKN) Incognita	-

#### Adaptation to Soil Types

Drought Prone	Good
High pH*	Good
Highly Productive	Best
Moderate/Variable Environments	Best
Poorly Drained	Good

For more information: Visit syngenta.ca, contact our Customer Interaction Centre at 1-87-SYNGENTA, or follow @NKSeedsCanada on X.

1-9 Scale: 1 = Best, 9 = Worst, (-) = Not Available. Adaptation and Responses: Best > Good > Fair > Poor Protein and Oil: Ultra High > Very High > High > Average > Low. Canopy Index: Reflects plant height, width and branching. 1 = Smallest, 9 = Largest.

Seed products with the LibertyLink(® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybears, and combine high-yielding genetics with the powerful, non-selective, posttemergent weed control of Liberty(® herbicide for optimum yield and excellent weed control. LIBERT LINK' 🖤

\* Represents an assessment of stand establishment, chlorosis severity and yield performance

Performance evaluations are based on field observations and public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions. IMPORTANT: ALWAYS READ AND FOLLOW SEED BAG/TAG DRECTIONS. Bayer is a member of Excellence. Through Stewardship@ (EIS), Bayer products are commercialized in accordance with EIS Product Launch Stewardship@ Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity (Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material paptroto of inflored in the other than the other of the other of the other oth

BASF, LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF Group. Only seed labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbioldes. It is a violation of federal law to use any pesiticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED AND APPROVED FOR SUCH USES. Ontatare the Pest Management Regulatory Agency with any questions about the approval so dicamba etbiolides in troop use with products with XtendFex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED AND APPROVED FOR SUCH USES.
