

## S0009-D6

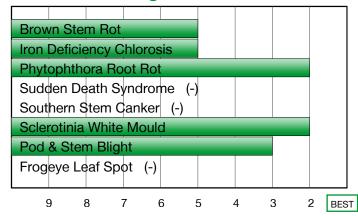

# EARLY SOYBEAN VARIETY FOR THE PRAIRIES OF WESTERN CANADA

- Narrow leaf variety with heavy pod clusters on top
- Excellent standability and Sclerotinia White Mould tolerance allows rotation with other host crops
- Ideally suited to drilled and narrow row width situations

#### **Plant Characteristics**

| Plant Height      | Medium-Tall      |
|-------------------|------------------|
| Canopy/Plant Type | Thin             |
| Branching         | Light            |
| Growth Habit      | Indeterminate    |
| Flower Colour     | Purple           |
| Pubescence Colour | Light Tawny      |
| Pod Colour        | Tan              |
| Hilum Colour      | Imperfect Yellow |

#### **Disease Ratings**

### Adaptation to Soil Types

| Drought Prone                  |   |
|--------------------------------|---|
| High pH*                       | × |
| Highly Productive              |   |
| Moderate/Variable Environments |   |
| Poorly Drained                 |   |

#### **Agronomic Traits**

| Emergence           | 3     |
|---------------------|-------|
| Standability        | 2     |
| Shatter Tolerance   | 2     |
| Green Stem          | 2     |
| Estimated Seed Size | Small |
| Avg. Protein %      | -     |
| Avg. Oil %          | -     |
| Narrow Rows         | 1     |
| Wide Rows           | 6     |

#### **Diseases and Pests**

| Phytophthora Root Rot (PRR) Source | S |
|------------------------------------|---|
| Soybean Cyst Nematode (SCN) Races  | S |
| (SCN) Source                       | - |
