SOYBEANS

S24-U5XF BRAND

RM: 2.4 | NEW | CHU: 3125

Go Anywhere Versatility with Top-End Yield Potential

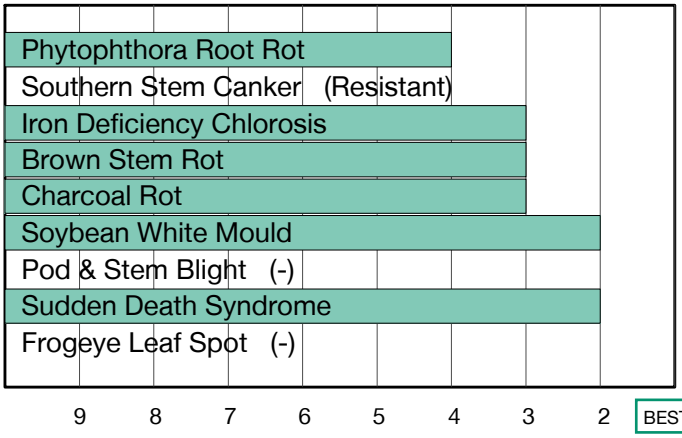

XTENDFLEX SOYBEANS

- Excellent performance on poorly drained soils
- Consistent yield potential under drought stress, with White Mould tolerance for high yield environments
- Great performance across yield levels

Plant Characteristics

Plant Height	**Medium-Tall**
Canopy/Plant Type	**Medium-Thin**
Branching	**Moderate**
Growth Habit	**Indeterminate**
Flower Colour	**White**
Pubescence Colour	**Light Tawny**
Pod Colour	**Brown**
Hilum Colour	**Black**
Chloride Sensitivity	**Includer**

Disease Ratings

Agronomic Traits

Emergence	**2**
Standability	**3**
Shatter Tolerance	**2**
Green Stem	**3**
Estimated Seed Size	**Medium**
Protein	**Very High**
Oil	**High**
Narrow Rows	**Best**
Wide Rows	**Good**
Metribuzin Response	**-**
Sulfentrazone Response	**-**

Diseases and Pests

Phytophthora Root Rot (PRR) Source	**Rps1c**
Soybean Cyst Nematode (SCN) Races	**MR3**
(SCN) Source	**PI88788**
Root Knot Nematode (RKN) Incognita	**-**

Adaptation to Soil Types

Drought Prone	**Best**
High pH*	**Good**
Highly Productive	**Best**
Moderate/Variable Environments	**Best**
Poorly Drained	**Best**

1-9 Scale: 1 = Best, 9 = Worst, (-) = Not Available, NA = Not Applicable.
Adaptation and Responses: Best > Good > Fair > Poor.
R = Resistant, S = Susceptible.
* Represents an assessment of stand establishment, chlorosis severity and yield performance.

Protein and Oil: Ultra High > Very High > High > Average > Low.
Canopy Index: Reflects plant height, width and branching.
1 = Smallest, 9 = Largest.

Roundup Ready 2 YIELD TECHNOLOGY | LIBERTY LINK®

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Performance evaluations are based on field observations and public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions. IMPORTANT: ALWAYS READ AND FOLLOW SEED BAG/TAG DIRECTIONS. Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

BASF, LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF Group. **Only seed labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.** It is a violation of federal law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED AND APPROVED FOR SUCH USES. Contact the Pest Management Regulatory Agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology. **Products with XtendFlex® Technology contain genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate** will kill crops that are not tolerant to glyphosate. **Dicamba** will kill crops that are not tolerant to dicamba. **Glufosinate** will kill crops that are not tolerant to glufosinate.
